

Alex Morand

Solutions Engineer - Customer-Facing Delivery & Python Backends

Three years embedded in client teams: requirements workshops, increment demos, production support, handover.
Backend engineer by training, most useful in the room where the customer explains the problem.

EXPERIENCE

HELMVALE CONSULTING Software Engineer (consultant) 2023 - present

NORTHBAY LOGISTICS 2025

Backend Engineer, embedded in the client's dispatch team · Lyon, France

Logistics Customer-facing

- Ran weekly workshops with the dispatch team to turn operational needs into a delivery backlog.
- Designed and shipped the REST API the dispatch team uses daily, from requirements workshops through to production.
- Joined the on-call rotation and wrote the runbooks for the three most frequent incidents.
- Documented the platform and handed it over to the client's in-house team at the end of the engagement.

Env. Python, FastAPI, PostgreSQL/TimescaleDB, Redis, Docker, GitLab CI

MARLOWE PAYMENTS 2024

Backend Engineer, working with the client's finance team · Lyon, France

Payments Support

- Presented each two-week increment to the client's finance stakeholders.
- Turned the finance team's invoicing rules, including proration and tax, into a working billing engine.
- Handled second-line production support: log analysis, root cause, fix, post-mortem.

Env. Python, Django, MySQL, Celery, pytest, Jenkins

KESTREL UTILITIES 2023 - 2024

Backend Developer, handover to the client's team · Lyon, France

Energy Documentation

- Wrote the onboarding guide for the service; the next two joiners shipped in their first week.

Env. Python, Django, PostgreSQL, Bash

VIREO ANALYTICS 2023 (6 months)

Data Engineering Intern · Grenoble, France

Data

- Automated a weekly report the analytics team had been producing by hand.

Env. Python, Airflow, SQL

SKILLS

Customer-facing	Requirements workshops, increment demos, second-line support, technical handover
Delivery	Scoping to production rollout, backlog shaping, documentation, runbooks
Technical	Python, SQL, REST API design, PostgreSQL, MySQL, Docker
